

GREE Clivia

Features: Standard Optional

Smart humidity control

It is the first time that Gere combines temperature, humidity, and energy efficiency variables to form the optimal temperature and humidity curve of human body with energy saving and select the most comfortable humidity range so that comfort and energy saving can be available by the users at the same time.

Clothes drying function

Clivia is specially designed with the continuous dehumidification function, which can meet the daily need for drying clothes. User doesn't need to place a dehumidifier at home and just an air conditioner can achieve both cooling and clothes drying.

UVC Sterilization

Use UVC to continuously irradiate the evaporator and the air passing through it to effectively remove multiple bacteria for comprehensive and efficient sterilization.

AI for maximum efficiency

Clivia is the world's first air conditioner with G-AI, an artificial intelligence system. It learns user habits to optimize energy savings and ensure comfort throughout the room. Save up to 10% on energy consumption annually with Clivia's intelligent algorithm.
